## Gusts

# Hazardous Weather

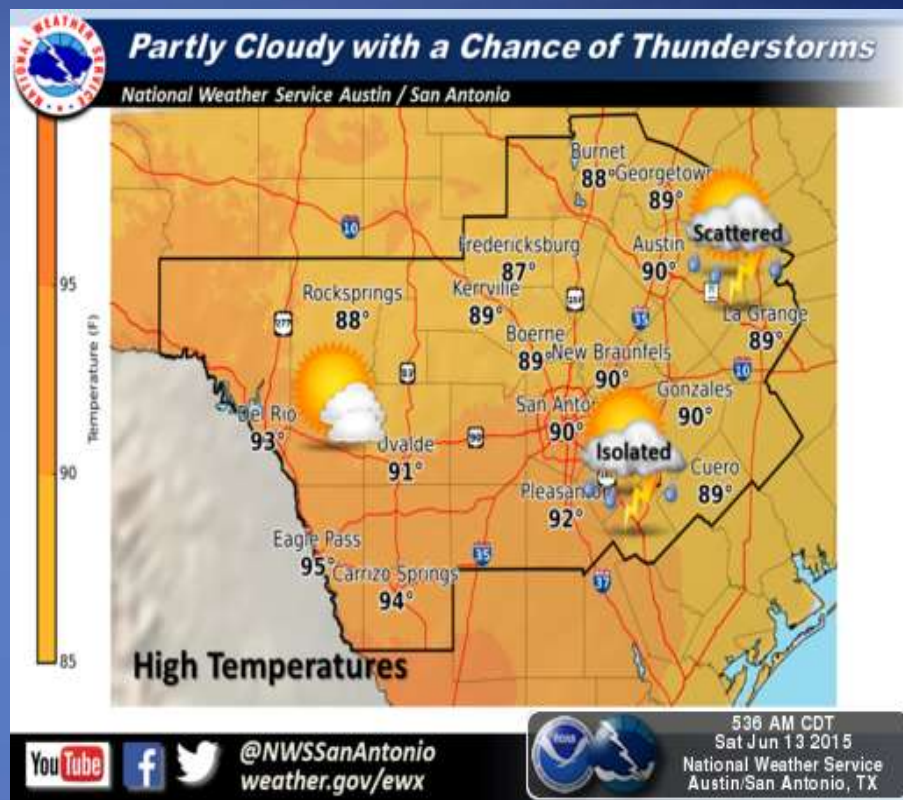

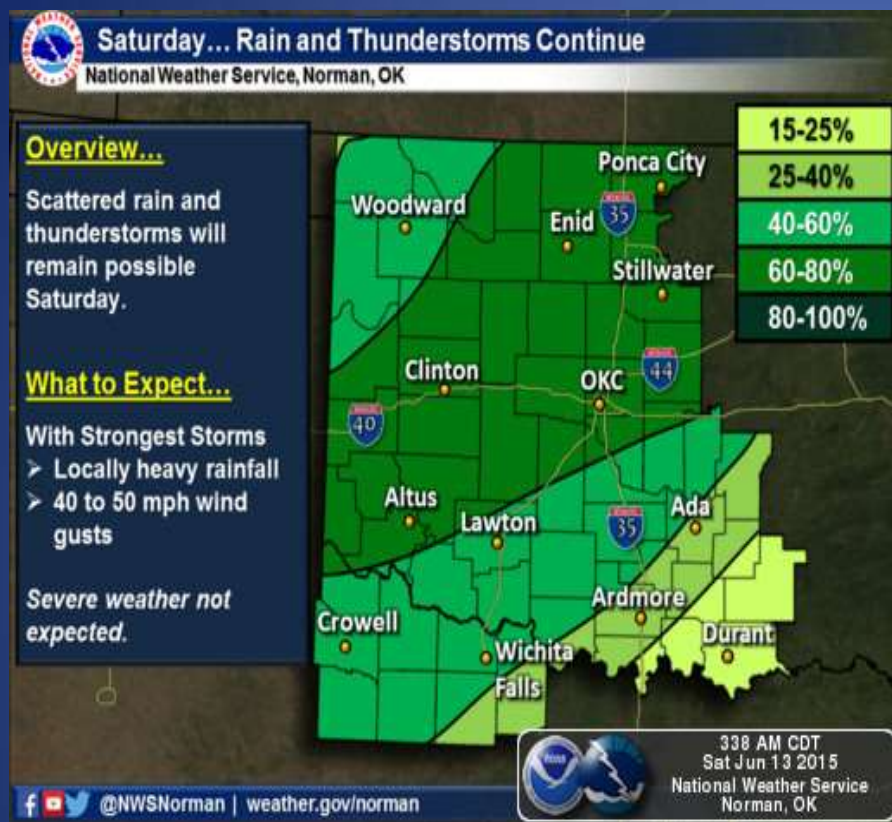

Another round of severe thunderstorms is expected this afternoon and this evening across the Permian Basin of west Texas south to the Davis Mountains and Lower Trans Pecos Region. The strongest storms will be capable of producing large hail, damaging winds and localized flooding and flash flooding.

More showers and thunderstorms can be expected today into tonight. Some of the storms this afternoon and evening may be strong to severe, as well as heavy rain producers, which could lead to some localized flooding.

# Hazardous Weather

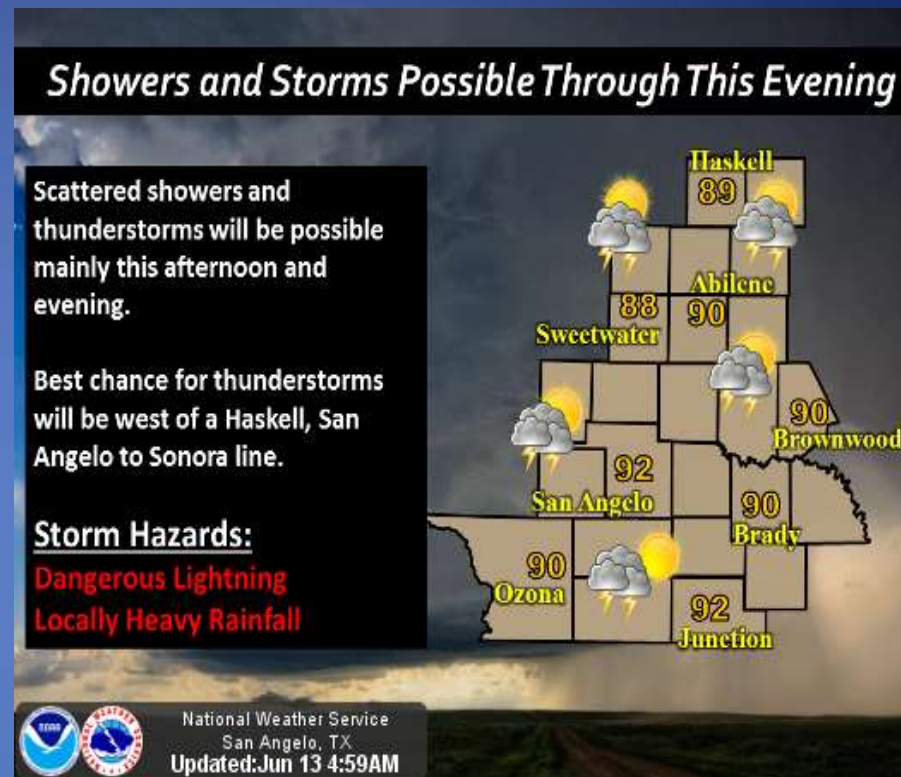

Areas of early morning low clouds will give way to mostly sunny skies. Isolated to scattered showers and thunderstorms are possible this afternoon across eastern parts of the forecast area. Near normal temperatures are expected with highs ranging from the upper 80s to the middle 90s. Winds will be from the south and southeast at 5 to 15 MPH.

# Hazardous Weather

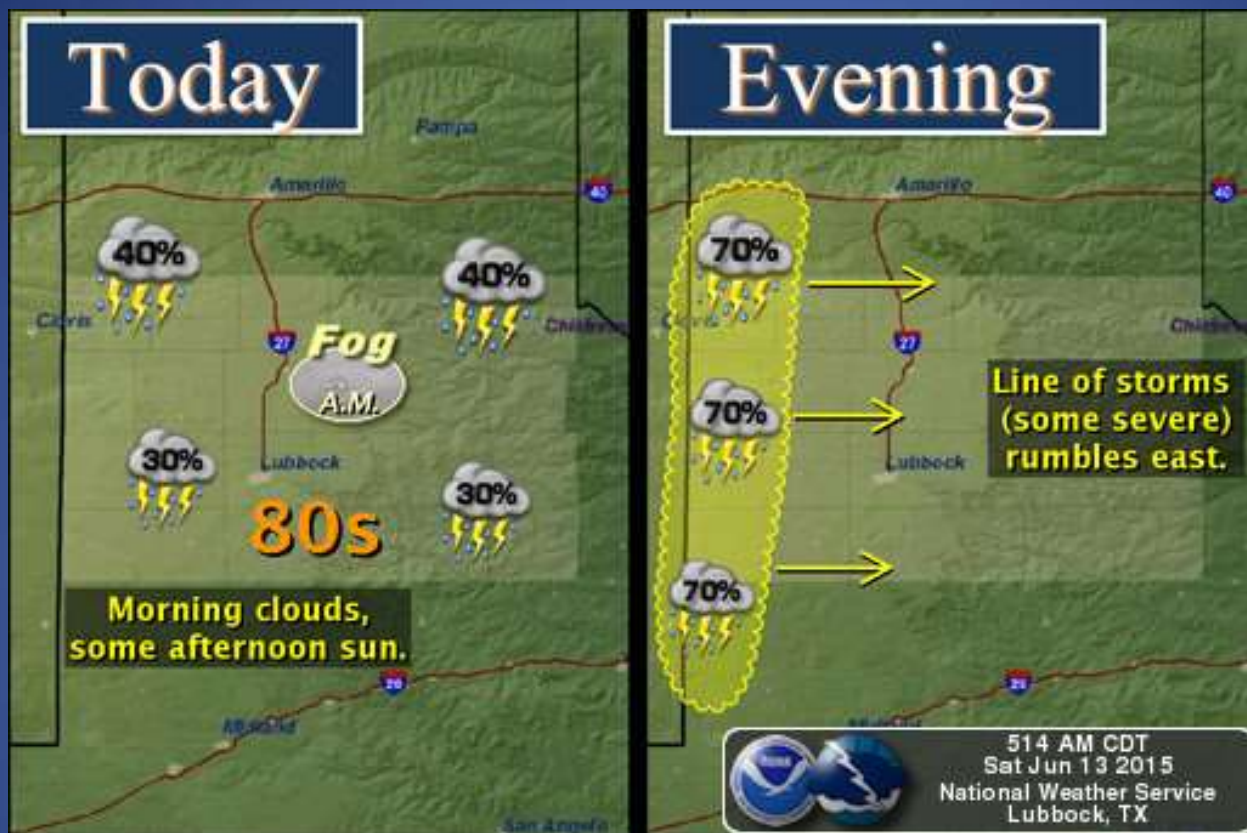

The combination of increasing moisture and atmospheric instability will contribute to isolated to scattered showers and thunderstorms Today. Small craft advisory conditions expected over the offshore coastal waters owing to high seas. Developing long period swell and moderate onshore flow will contribute to a high rip current risk Today along the Middle Texas Coast.

# Hazardous Weather

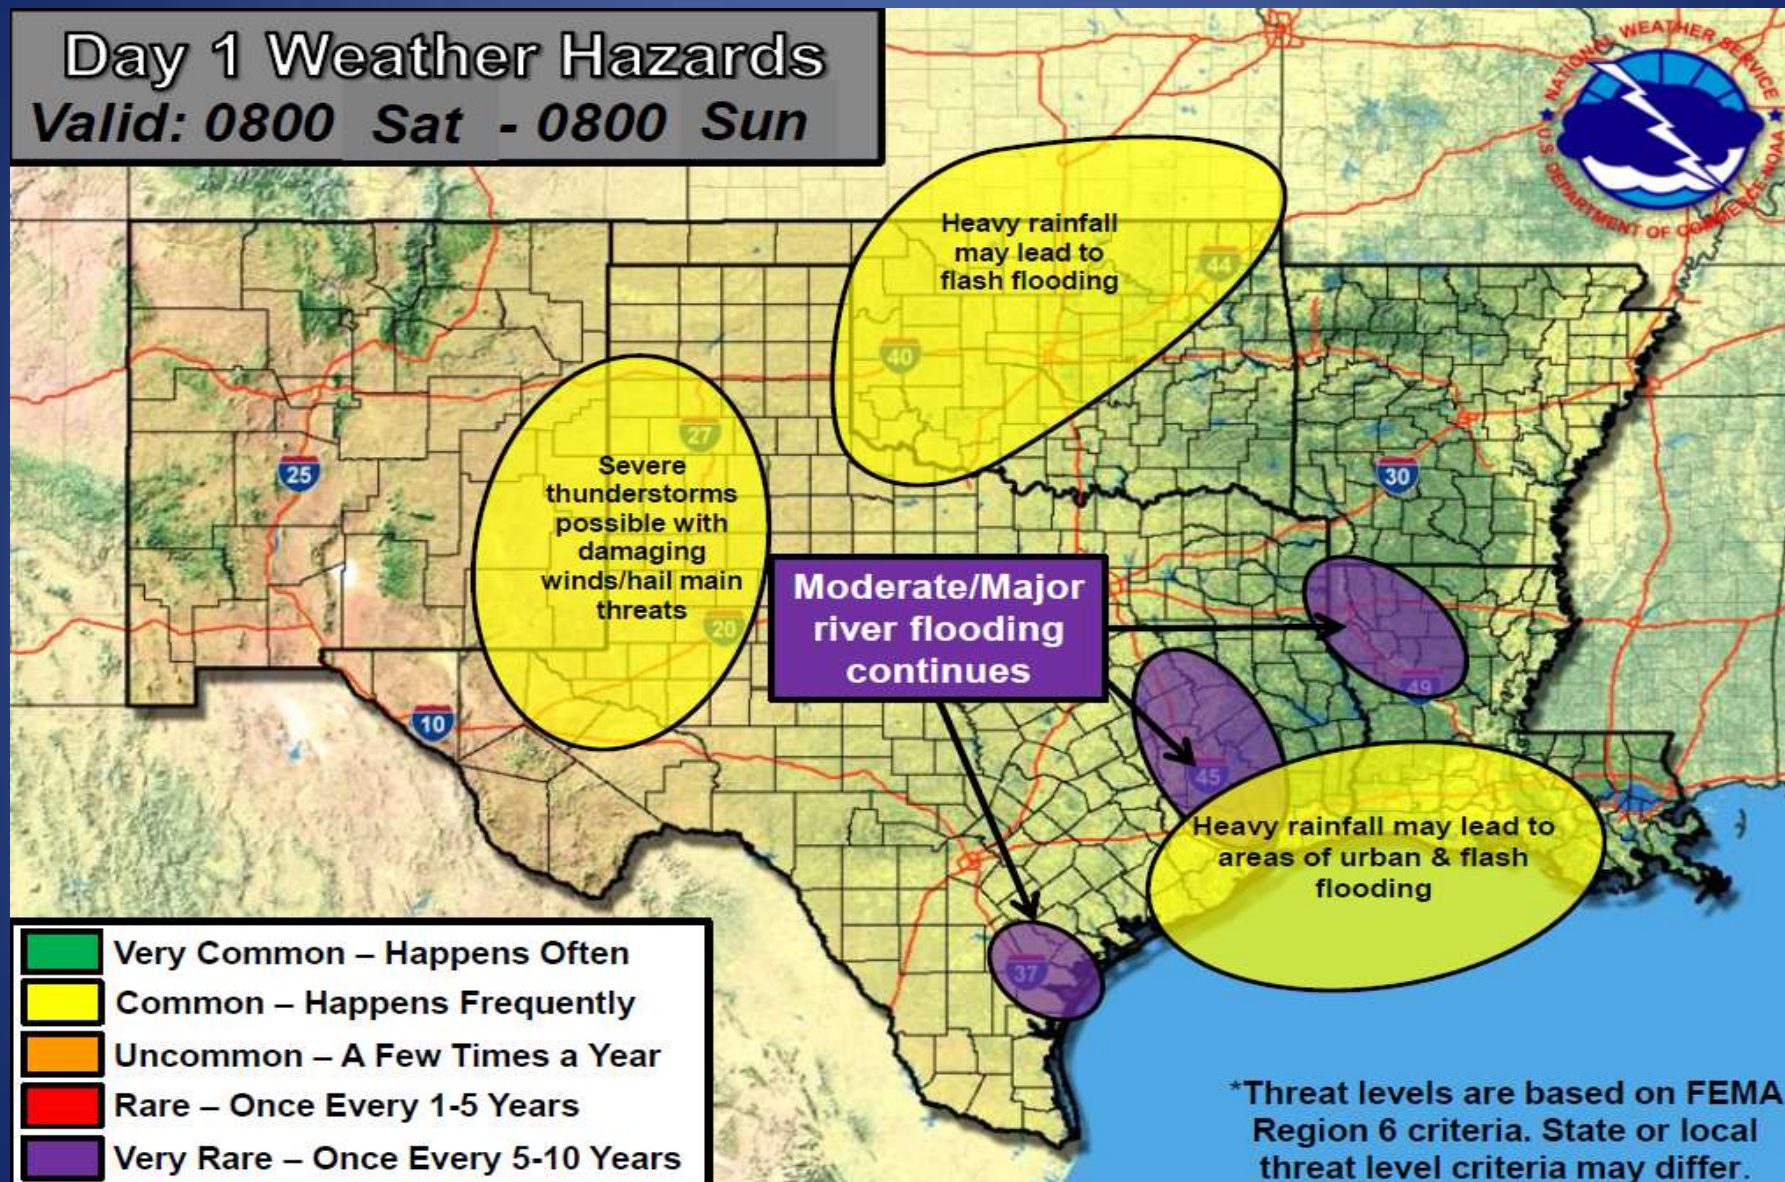

In addition to some early morning fog, isolated to scattered showers and storms will move eastward today before a line of thunderstorms develops late this afternoon and evening near the New Mexico state line. This line of storms could produce severe hail and wind as it rumbles east past sunset. Highs will top out in the low to mid 80s.

# Hazardous Weather

## Day 1 Weather Hazards

Valid: 0800 Sat - 0800 Sun

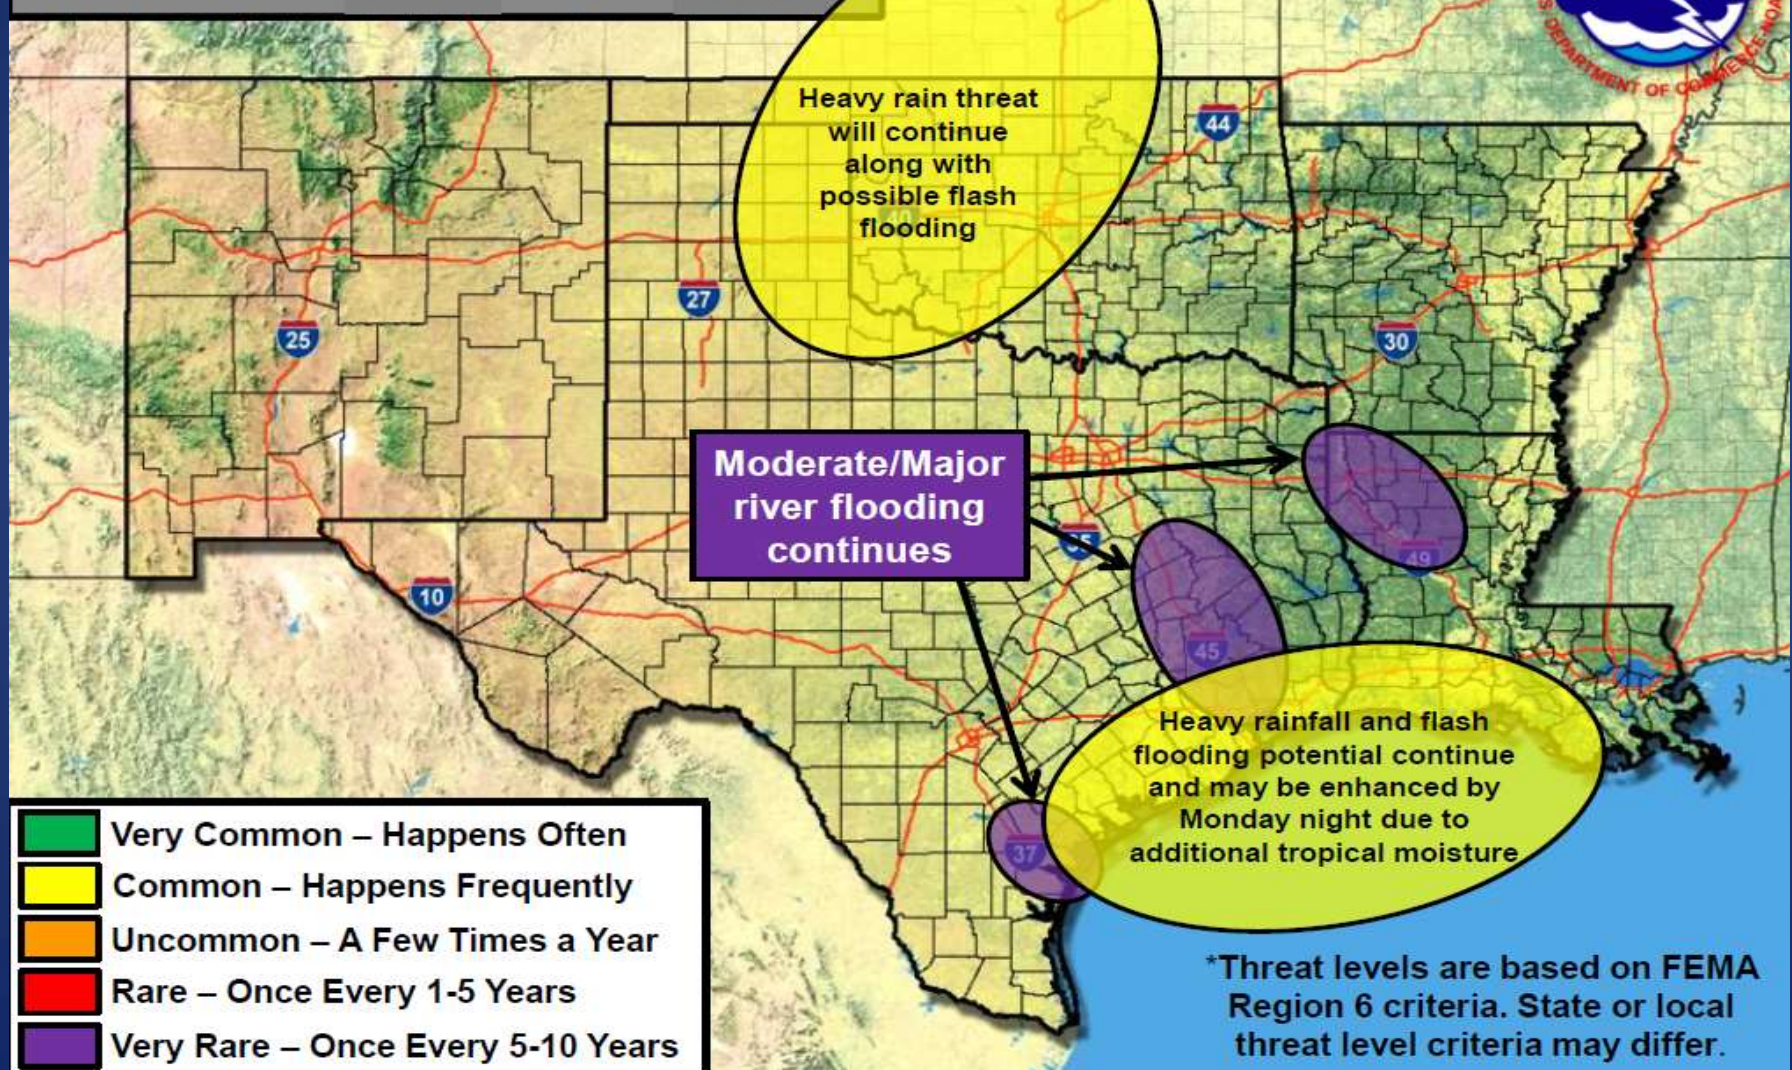

# Hazardous Weather

Day 2-3 Weather Hazards

Valid: 0800 Sun - 0800 Tue
